PROFESSIONAL SUMMARY

Full-stack developer (React, Node.js/Express, PostgreSQL/Prisma) with a CS Honors degree, shipping Dockerized applications to AWS EC2/RDS. Built Agora, a session-authenticated discourse platform on a 5-model relational schema, and a multi-client REST API. Brings 10 months of IT operations experience writing C# data-migration scripts and debugging client systems down to the network layer.

TECHNICAL SKILLS

Languages: JavaScript, Java, SQL, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, Passport.js, Prisma ORM

Frontend: React, Vite, EJS, Bootstrap, Material UI, Tailwind CSS

Database: PostgreSQL, MySQL, SQLite, relational schema design

DevOps & Engineering: AWS (EC2, RDS), Render, Docker, Git, GitHub, Linux, OOP, DSA

PROFESSIONAL EXPERIENCE

IT Support Technician | Combat Computers | *Charlottetown, PEI* *Sept 2025 – June 2026*

C#, C, MySQL, Advantage Database, HTML, CSS, JavaScript, Bash Scripting

- Streamlined client onboarding by engineering reusable C# migration scripts, eliminating 10+ hours of manual SQL data transformation per client environment.
- Served as the first technical point of contact across 100+ client environments, resolving 25+ technical tickets weekly with a 25-minute average resolution time.
- Reduced a recurring server outage from 50 minutes to 15 minutes by identifying and fixing the root cause in network infrastructure involving routers and TCP/IP.
- Managed DNS/domain configuration for 6 client domains and coordinated 8 email migrations with zero downtime, troubleshooting issues across software, systems, and network layers.

Web Developer | Direct NutriScience | *Charlottetown, PEI* *May 2024 – Aug 2025*

React.js, Node.js, PostgreSQL, Prisma, Express, MySQL, HTML, CSS, JavaScript

- Built and shipped 4 full-stack client websites with React frontends and Node.js/Express backends on PostgreSQL.
- Migrated 3 production databases from MySQL to PostgreSQL with Prisma ORM, normalizing schemas with foreign-key relations and removing redundant columns to reduce data duplication.
- Collaborated cross-functionally with production and manufacturing teams to translate product specs into web features.
- Managed staging, pre-release testing, and DNS setup for each launch, deploying to their hosting providers.

PROJECTS

Agora – Text-Only Long-Form Discourse Platform *Aug 2026 – Sept 2026*

Node.js, Express, Prisma ORM, PostgreSQL, React, Vite, Docker, AWS EC2/RDS, Passport.js

- Deployed a containerized full-stack application on AWS EC2/RDS, implementing 11 REST endpoints and Passport.js-based session authentication.
- Designed a 5-model relational schema with database-level uniqueness constraints and cascading deletes, with protected React routes and a custom SPA UI.

Messaging App – Full-Stack Direct Messaging Platform *June 2026 – July 2026*

React, Vite, Material UI, Node.js, Express, Prisma, PostgreSQL, Passport.js (JWT), Render, Neon

- Built and deployed a full-stack messaging app on Render with Neon PostgreSQL, using stateless JWT authentication via Passport.js, bcrypt password hashing, centralized error handling that maps Prisma errors to correct 409/404 responses.
- *Managed React auth state with the Context API, including token-expiry checks, session rehydration, and protected routes, and delivered near-real time conversations over REST with 3-second polling.*

EDUCATION

B.Sc., Computer Science (Honors) | University of Prince Edward Island *Sept 2021 – May 2024*

- Award: Science Atlantic 2023 – 3rd Place, Undergraduate Computer Science Research.
- Honors Thesis: Exploring Ubuntu Touch OS: Privacy, Performance and Private Server Integration.
- Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Operating Systems.
